Where I've Been

App Academy '14
Web Development Immersive

New York University '13
B.S. Marketing

What I've Done

App Academy - New York, NY
Software Developer & Teaching Assistant
July 2014 - present

- Redesigned software to track students' progress, resulting in more valuable data and a better user interface
- Taught Ruby on Rails and Backbone.js and led lectures on basic API consumption and Heroku
- Debugged and refactored students' code
- Increased test coverage of the Progress Tracker from about 50% to well over 90%

What I've Made

A Very Hungry Caterpillar - [live](#) | [github](#)

- JavaScript implementation of the classic game Snake to the theme of the classic Eric Carle children's book
- jQuery for user interface

for pizza & bunny - [live](#) | [github](#)

- Chatroom built on Node.js and Backbone.js
- Emits events when typing and allows for private chats

Clickster - [live](#) | [github](#)

- Social clone of Flixster for TV shows
- Built on Rails & Backbone.js
- Utilizes OMDB API to grab TV show info
- Currently remaking with mobile-first design
