SKILLS

- Rails
- Ruby
- JavaScript
- Backbone.js
- CSS
- HTML
- SQL
- Git
- React
- Node.js

EDUCATION

New York University '13
B.S. Marketing

EXPERIENCE

App Academy - New York, NY

Software Engineer & Instructor (*July 2014 - September 2015*)

- Re-engineered Rails back-end infrastructure of internal student CRM to support scale across multiple cities
- Designed and implemented responsive web interface with Backbone.js and CSS/SASS, creating a seamless experience across web and mobile
- Worked daily with students one-on-one debugging and reviewing their code, increasing their confidence as programmers and contributing to the program's job placement success rate of 98%

PROJECTS

Qliqster - [live](#) | [github](#)

Responsively-designed web app to track TV shows

- Searches flexibly through TV show titles and usernames with interchangeable numerals and words

hello world! - [live](#) | [github](#)

Live chatroom with private chat functionality

- Tracks live typing in private chats by incorporating events emitted with socket.io to a Node.js server

dollabill - [github](#)

Custom implementation of jQuery with vanilla JavaScript

- Uses native XMLHttpRequest API to build AJAX request
- Includes Mocha.js test coverage of DOM manipulation
