SKILLS

- JavaScript
- Backbone.js
- React
- Node.js
- Ruby
- Rails
- CSS/Sass
- jQuery
- HTML
- Git
- SQL

EDUCATION

New York University '13
B.S. Marketing

EXPERIENCE

Software Engineer *(July 2014 - September 2015)*
App Academy - New York, NY

- Project lead for internal student CRM - coordinated with SF team to design and build features and performed code reviews, ensuring code quality and maintainability

- Designed and implemented responsive front end interface with Backbone.js and CSS/Sass, creating a seamless user experience across web and mobile

- Re-engineered Ruby on Rails back end to support scale across multiple cities, including optimizing SQL queries

- Created internal test suite with RSpec and Capybara, ultimately achieving ~95% integration test coverage

PROJECTS

Qliqster (Rails, Backbone.js, AWS, SQL) - live | github
Responsively-designed web app to track TV shows

- Searches flexibly through TV show titles and usernames with interchangeable numerals and words

dollabill (JavaScript) - github
Custom implementation of jQuery with vanilla JavaScript

- Uses native XMLHttpRequest API to build AJAX request
- Includes Mocha.js test coverage of DOM manipulation

hello world! (Node.js, Backbone.js) - live | github
Live chatroom with private chat functionality

- Tracks live typing in private chats by incorporating events emitted with socket.io to a Node.js server
